

FLIP FORMS

VISUAL ANALYSIS V – Visualization 2

PURPOSE: To develop the ability to recall visually presented materials and to manipulate these images mentally.

PROCEDURE: Step 1: On the following worksheets, in box 2, draw the figure in box 1 as if you flipped it from left to right or around the vertical axis (see example). In box 3, draw the figure in box 2 as if you flipped it from up to down or around the horizontal axis. In box 4, draw the figure in box 3 as if you flipped it around the vertical axis.

1	b	2	d
4	p	3	q

Step 2: Once your child is good at the procedure above, skip drawing in box 2 and have your child mentally flip the figure twice and draw the result in box 3.

1	b	2	
4		3	q

Step 3: Once your child is good at the procedure above, skip drawing in box 2 and 3. Have your child mentally flip the figure 3 times and draw only the final result in box 4.

1	b	2	
4	p	3	

Step 4: Use the blank worksheets to mentally flip other letters in the alphabet or numbers.

As your child improves, more complex forms can be used.

GOAL FOR THE WEEK:

Handout developed by The Studt Center for Vision Therapy, Southern California College of Optometry, Fullerton CA. Can be modified by the user.
From Scheiman M, Rouse M. Optometric management of learning-related vision problems, 2nd ed. St. Louis: Mosby, 2006.
